

ERFAN NARSHIRIN

Front-End Developer

Tehran, Iran | 0933-5062488 | Erfan98nari@Gmail.Com | [Linkedin.Com/In/ErfanNarshirin](https://www.linkedin.com/in/ErfanNarshirin)

SUMMARY OF QUALIFICATIONS

Frontend Developer **With +4 Years** Of Experience Building Scalable, High-Performance Web Applications Using Angular And The Vue Ecosystem (Vue.Js, Nuxt.Js).

Experienced In Designing Clean, Maintainable Architectures And Developing Reusable Component Systems For Complex, Enterprise-Level Applications.

Actively Leveraging AI-Powered Tools Such As Cursor, Claude AI, And OpenSpec To Enhance Development Workflows, Accelerate Feature Delivery, And Improve Code Quality. Skilled In Combining Traditional Software Engineering Principles With AI-Assisted Development To Deliver Faster, More Efficient, And More Reliable Solutions.

Passionate About Modern Frontend Technologies, Performance Optimization, And The Evolving Landscape Of AI-Driven Development.

WORK EXPERIMENTS

Smart Trade Development MAD (Tapin)

Dec 2021 – Present

- Developed And Maintained Large-Scale Enterprise Web Applications, Improving Overall System Stability And Reducing Critical Frontend Bugs **By ~25%**
- Architected And Delivered A Modular Admin Panel Using Nuxt 4, Reducing Feature Implementation Time **By ~35%** Through Better Structure And Reusability.
- Designed Scalable Frontend Architecture Patterns, Enabling **~40%** Faster Development Of New Features Across Multiple Projects.
- Built Reusable UI Component Libraries, Reducing Code Duplication **By ~50%** And Improving Team Development Consistency.
- Implemented NgRx And RxJS, Improving Data Flow Predictability And Reducing State-Related Bugs **By ~30%**
- Optimized Application Performance, Achieving **30%** Faster Load Times And Smoother User Interactions.
- Leveraged **Matomo** Analytics To Identify User Drop-Off Points, Reducing Bounce Rate **By ~25%**

AI-DRIVEN IMPACT

- Integrated AI Tools (Cursor, Claude AI) Into Daily Workflow, Increasing Overall Development Speed **By ~40–50%**
- Reduced Debugging And Issue Resolution Time **By ~35%** Using AI-Assisted Analysis And Suggestions.
- Leveraged OpenSpec To Generate Structured Specifications, Reducing Requirement Ambiguity And Rework **By ~30%**
- Accelerated Feature Prototyping And Iteration Cycles **By ~45%** Using AI-Assisted Development Workflows.
- Automated Repetitive Coding Tasks, Saving **~20–30%** Of Development Time On Routine Implementations.
- Improved Code Quality And Consistency By Applying AI-Assisted Refactoring And Review Processes.
- Reduced Time From Idea → Implementation **By ~40%** By Combining AI-Generated Specs With AI-Assisted Coding.
- Increased Decision-Making Speed For Technical Approaches **By ~25%** Using AI-Driven Solution Exploration.

WORK SKILLS

EDUCATION

Bachelor Of Electronics Engineering

Technical And Vocational University (Shahid Montazeri)

Thanks For Your Time
